# What does iptt offer your business?
Push to Talk Over Cellular (POC)

iptt's Push to Talk over Cellular Radio Solution is based on IOT and M2M principles applied to professional two-way communication. iptt is the one stop shop for PTT Radio solutions:
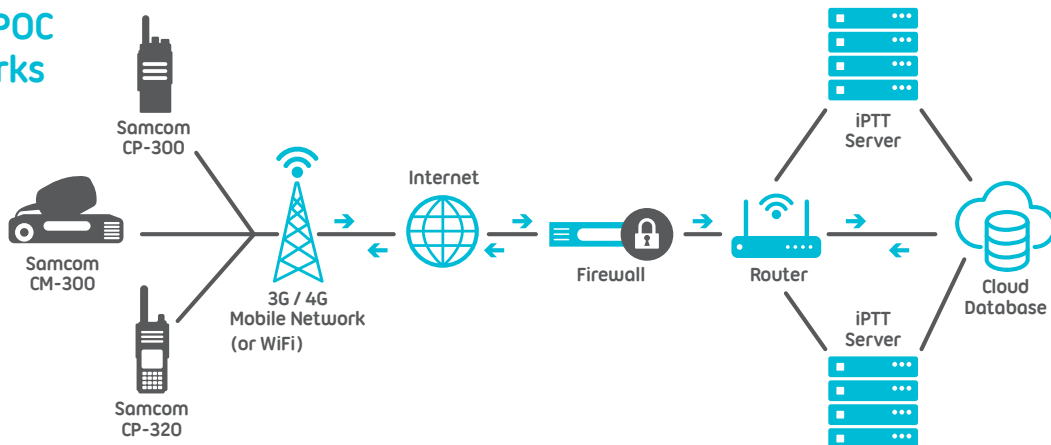

1. Server and IT infrastructure
2. Hardware: *devices and accessories*
3. Software for Windows, Android and iOS
4. Professional multi-network and single-network SIM cards
5. 4G Routers
6. Technical Support
7. Sales Support
8. Customer Service

IT and Server infrastructure and operations designed to deliver:

- Redundancy
- Resilience
- Robustness
- Security
- Scalability
- Speed
- Several data centres across the UK
- International backup

How iptt's POC system works

iptt is focused on delivering professional two-way communication.

iptt is committed to customer support for resellers and end users.

iptt is obsessed with quality.

iptt does not operate a ticketing system.

iptt offers remote technical support is free of charge (FOC).

iptt have an excellent product range with handheld and mobile PTT Radio terminals.

iptt listen and deliver. With more products being added to cater for customer feedback.

iptt's solution is currently used in these industries: construction, events,transport, local councils, parking, retail, security and enforcement.
